

Each Sachet of product contains:

Sodium chloride	14.5 g
Potassium chloride	
Tri sodium citrate	16.5 g
Dextrose	

Target Species: Livestock

Mode of action:

Oral Rehydration Solution (ORS) is an oral powder containing mixture of glucose, electrolytes (sodium chloride and potassium chloride) and sodium citrate. They are intendent for the prevention and treatment or dehydration, including maintenance therapy. The effectiveness of ORS depends on the ability of glucose to stimulate Na and fluid absorption in the small intestine.

Indications:

ORS is effective against all bacterial, viral and non-infectious forms of diarrhea to control of dehydration veal calves.

Electrolyte balance during stress and disease condition. Control of Acidosis and compensation of sodium and potassium.

Contraindications:

It is contraindicated in animals with upper gastroint estinal obstruction .

Dosage and mode of administration:

25 grams of ORS powder per 1 liter of drinking water (Proportionate to livestock weight 1 to 1.5 liters of solution 3 times a day for 3-5 days)

Notice:

ORS should not be used in animals with severe dehydration (down, comatose or in a state of shock) such animals need intravenous fluids, since oral therapy in these cases is too slow. Duration and amount of use should be prescribed by veterinarian.

Medicated solution should be freshly prepared daily and consumed within 24 hours.

Medicated drinking water should be the only water source available .

Administration oral solution or water soluble powder in different seasons (warm or cold weather) depends on consumption of water by the target animal.

Withdrawal Time: None.

Precaution: For veterinary use only. Keep out of reach of children.

Storage: Keep in closed original pack, cool and dry place, below 25° C. Protect from direct sunlight.

Shelf life: 2 years from the date of manufacture. **Packing:** 100g and 500g 3 layer laminated sachet.
